

Elma Laser 4 Dual distance meter, 2 x 60 meters

The Elma Laser 4 Dual is a truly unique distance meter that measures in both directions, or up and down. No more getting on your knees to measure a room height, or having to go all the way to the wall to find the width. With the Elma Laser 4 Dual, you simply measure from the middle of the room, and with its dual laser, it measures both the distance to the ceiling and floor, displaying the total room height. Or, stick your hand through the ceiling hatch and measure the entire length of the attic in one press. This saves time and ensures accurate measurements.

The laser is also equipped with a digital color display that rotates based on how the instrument is held, making readings easy from any angle. In addition to the digital display of the tilt, a digital version of the bubble level has been added, which, with its clear green color, indicates when the instrument is held horizontally.

Furthermore, the instrument features many standard functions from professional distance meters, such as tracking for continuous measurement, the Pythagorean function for indirect measurements like façade heights, etc. It also includes the +/- function and a calculator for calculating areas and volumes. It is delivered complete with a carrying case, batteries, and a user manual.

Technical data:

Dimensions H x W x D:	20 mm x 35 mm x 102 mm
Display Display:	Colour display
IP Rating IP rating:	andet
Weight Net weight:	100 g
Power Supply Batteries:	1 Li-ion (incl.)
Power Supply/Charger Mains Supply:	110 V - 230 V AC
Lasers and Distance Meters Type:	Distance Meter
Lasers and Distance Meters Laser type (colour):	Green
