

## Elma 44 TDR meter

Fault locator and cable length meter

Elma TDR 44 is a small and handy TDR meter (Time domain reflectometer), suitable for fault locating and cable length measurement. The Elma TDR 44 is easy to use and provides fast help, when locating e.g. short circuits, disconnections, cable length etc. The large, backlit display makes precise measurements fast and easy. The instrument is suitable for all cable types to 3000 meters and is provided ready to use in a bag incl. batteries, test leads and manual.

### Technical data:

#### Reflectometer and cable length measurement

|                                   |              |
|-----------------------------------|--------------|
| Display :                         | LCD & Diode  |
| Ingress Protection (IP):          | 44           |
| Dual trace (comparison):          | No           |
| Range (km) max:                   | 3            |
| Best accuracy :                   | 0,9%         |
| Application temperature (°C) min: | -20          |
| Application temperature (°C) max: | 60           |
| Weight (g):                       | 550          |
| Dimensions HxWxD (mm):            | 210x100x50   |
| Battery:                          | 6 pcs, Inkl. |
